Fall Sale
November 15, 2018

Wheatland, Wyoming

Welcome to another K2 Red Angus Fall Sale, and the 1st one at our home place! We are pretty excited to be able to have everyone to our place for this year's fall sale. Please come and visit us, look over the cattle, and enjoy a great BEEF lunch!

We are thankful for all of you who take the time to look at the catalog, visit, see the cattle, and decide to make our genetics a part of your operation! The foundation of the genetics we offer you is the standards we set for our herd. We emphasize profitable cattle that fit the plains and mountain regions, where grass and water can be in short supply. Cows must be good mothers, thrive in their environment, and be structurally sound to travel our country.

There are several things that make it possible for us to do all that we do here. One is you; our friends, customers and fellow Red Angus breeders! Another is the friends and family that work with us all year long. We have an awful lot to be thankful for!

Sincerely,
Jason & Kim

2 Year old heifer from the high selling set of heifers in the Fall 2017 Sale, with her Max daughter—look for her in the 2019 sale.

Bull Guarantee

Bulls have been fertility, Trich & BVD tested. Bulls are guaranteed to pass a fertility test again next spring or summer prior to the buyer's breeding season.

Breeding season Guarantee— If for any reason your bull cannot complete his first breeding season, we will do our best to provide a replacement for the needed time to finish out the breeding season.

Refunds will be given as credit to a future sale, less salvage value. Bulls must be in adequate breeding condition.

Bull Delivery

* $100 credit for bulls picked up sale day.

Free delivery 150 miles per bull, up to 450 miles.

Additional miles will be charged at .50/mile.

Neighbors delivered to one location can count as one total volume.

Delivery will take place within two weeks after the sale, or to the best of our ability with weather and locations.

Females Guarantee

Females are guaranteed to have been preg checked at least once prior to sale, and guaranteed to be confirmed pregnant if the buyer chooses to have them re-checked before January 1, 2019.

Cows were vaccinated in September with Virashield 6 VL5, and were poured with Cydectin May 2018.

Heifers have been vaccinated prior to breeding with Bovishield Gold FP5, and Cydectin Injectable dewormer.

In August heifers were vaccinated with Guardian.

Females

Buyers will need to load out cows and heifers following the sale, unless other arrangements have been made. We will be glad to assist in shipping arrangements.

After November 20th feed charges of $4.50 per head per day will be charged on any females remaining.

We are happy to work with each buyer to make these arrangements work in the best way possible for their operation.

Payment

Payment should be made to K2 Red Angus.

Spring & Summer Calving Program

Our goal of adding the summer calving herd to our program is growing into the vision we had planned for years.

I think one of the most important defining principles for us is the fact that these are two different herds. Typically if an operation has two calving seasons I expect that lower fertility animals are given second… and third, chances. That is not the case here! We do not put open cows or heifers from one group to the next, opens are culled out of the herd because we select hard for fertility.

The way we run our operation we are spread out over 3 sides of the county, and actually run in 4 counties. These different locations are naturally adapted to different calving times.

The other main driving factor in our two seasons is labor. We have pretty limited labor, and cutting every project we have in half — half for the spring herd, and half for the summer — really makes the best use of the labor we do have. (That being said we have such great people that work with us! Come meet them all sale day.)

We maintain a much smaller bull battery for our own herd with the two calving seasons. Between our use of AI and ET, along with the two seasons, we use about 8 bulls on what could easily take 24.

The same genetics that we have selected for over the years are in the summer program! We started this herd with embryos collected from the top producers in our spring herd, most of these being cows over 10 years old and well proven at the traits we strive for.

We strive to offer top quality, profitable cattle to our customers in both our Fall and Winter sales!

Lots 1-25

Bulls

Bulls will sell in lot order.

These bulls are all registered and can be part of the Red Angus Feeder Calf Certification Program (FCCP).

We will be glad to help buyers learn about this program or enroll their calves. Katie Oschner, Red Angus Association Commercial Marketing Specialist, will also be at the sale and available to help buyers with the programs Red Angus has to help commercial producers add value to their Red Angus Calves.

This bull is out of one of our best cow lines. 605 (granddam) is the donor dam of lots 3-6) , Dam 206 raised our high seller, K2 Max, as a 2 year old. 206 broke her leg up in the mountains while raising this bull. She still brought him in at weaning, but he was behind what she is capable of producing! There is lots of power in this bull.

Long bodied, super thick bull out of a really great cow. Perfect udder on his dam. This bull has been a standout since he was a calf. This bull has a lot of power and eye appeal. True outcross pedigree!

Lots 3-6 are full ET brothers out of a great 12 year old donor cow. She never missed a year calving, even while being flushed. 605 has a great udder and foot structure, and weaned a nice big calf again this year! These bulls are very powerful, in a moderate package.

Possibly the most powerful bull in the sale. We bought this set of embryos at Red on The Rocks. His full sisters are great heifers. Moderate birth, excellent growth.

Very dark red bull, with more stretch and power.

Lots 26-30

Commercial Bred Heifers

We have divided the heifers into 5 groups to help buyers get the exact females that fit their program. Heifers are divided by solid or brockle color, and calving dates. Complete descriptions are noted for each lot.

Heifer Development:
Heifer development was a big part of our family's operation growing up. And when I say big part I am not necessarily talking numbers, but importance. Heifers were grown out in a way to make them profitable cows with a long future in the herd. The other aspect that fits in to how we develop these heifers is Kim's 18 years and over 70,000 head experience in the custom AI business. This was an opportunity to see many ways of developing females! These heifers were ran out on large fields and pastures all fall and winter. They grew out and learned to forage and travel. We put the heifers in our lot for about 60 days for AI. There they get a ration of grass and alfalfa hay and oats. Then it is back out to pasture until sale day.

Not just any heifers…

The heifers we purchased were bought to develop, breed and offer to our customers as bred females. They are from sources well known to us, and I will give you a little background on each of them.

CB & Rena Valentine
Long time friends and bull customers for over 14 years. They have an excellent set of cows, and this herd runs at high elevation every summer. Thank you to this family for such a great set of females for our sale, and also for the fantastic set we already bought for 2019!

Cam, Abby, Halle and Keen Huston
Good friends, that also work with us and our cattle year round. They have a great set of Red Baldy cows, and we are fortunate enough that we get to pick some heifers from their herd every year! Abby also owns Cowpokes Custom AI, and is a Genex Beef Representative, so these heifers have some great genetics. They have also used K2 bulls over the years through AI and natural service.

Brant Ranch
The Brant family near Wheatland has bought several K2 bulls over the last 10 years. They have a great set of red and red baldy cows. These cows have spent the summer in high elevations for generations and are well adapted to Wyoming range. We thank Terry Brant and his family for letting us pick some heifers from their herd again this year, and already have plans to purchase more for 2019.

Dale Oliver, Jason & Tycie Lichtey
We have gotten to know this family through Dallas Mount who summers their cows near Wheatland. These heifers are out of K2 and Axtell Red Angus bulls. We love Axtell bulls ourselves, so they fit right in here. We got to calve out some of the females from this operation last spring. They were a really great set of young mamas. We have already purchased our 3rd set of heifers from them for the 2019 sale. When it works well why stop!

Home Raised
We run our commercial cows right in with the registered cows. They get AI bred and then the same natural service sires that are with the registered cows. The goal for our commercial females is to raise top quality heifers to offer in this sale. This year there are several daughters of 3SCC Domain (Genex) as well as our high selling Redemption son—Redeemed 457.

Commercial Bred Heifers

Heifers have "breeding" tags in their right ear.

Blue tags = AI bred May 17-19, Due Feb 25

White tags= bull bred, March calving

Orange tags = bull bred, April calving

All heifers offered here will have 2019 calves eligible for FCCP tags.

Lot 26

AI Bred Females

76 head

Blue breeding tags

Due February 25th

Sell in gate cut of 5 or more.

Top end heifers, all synchronized and AI bred over a 3 day breeding period.

Bred to SR Here We Go. We own this sire with Genex and Ronny & Kelsy Pope. For the past year we have used him hard in both our spring and summer breeding programs. He covered the cows and the country well, and came out still in great flesh (well several people around here call him fat, but I know how hard he works!). We weaned his first calf crop September 2018. These young females are amazing! Moderate frame with excellent capacity. They already look like mama cows.

Registration # 3520779

11 head

White(9) and orange (2) breeding tags

Sell in gate cut of 5 or more, or split white and orange tags for calving dates.

Red Angus Marketing Programs

Service Sires for Bull Bred Heifers

Heifers were exposed to K2 Red Angus bulls, that are all half brothers, out of Poke Neb707 9116 1064. (We just call him 1064 for short.) We have used 1064 as one of the AI sires on our registered heifers for 3 years, and we like everything he does. They calve easily and unassisted. Calves have good growth and turn into deep bodied thick yearlings.

Lots 31-34

Commercial Bred Cows

Lot 31

Bred Cows—2 & 3 year olds

10 head

AI bred May 22-25

See additional breeding sheet for individual AI matings.

Bull bred until July 20th

Natural service sires; Here We Go, Axtell Red Knight, VGW Stout

We have done all the hard part of getting them raised, grown and weaned the first calf. Now you can get a super set of young females headed for a long productive life.

K2 Paprika 305 605—Donor dam of lots 3-6.

Lot 32

Bred Cows—4 & 5 year olds

7 head

AI bred May 22-25

See additional breeding sheet for individual AI matings.

Bull bred until July 20th

Natural service sires; Here We Go, Axtell Red Knight

These are some of our best producers! A great set of young cows in their prime. Not a single one I would hesitate to keep myself (if I didn't have to make room for all the registered bred heifers!)

Lot 33

Bred Cows—6 & 7 year olds

3 head

AI bred May 22-25

See additional breeding sheet for individual AI matings.

Bull bred until July 20th

Natural service sire; Axtell Red Knight,

We try to offer cows out of each age group. There will never be a cow in our Fall Sale that has been open, ever! These 3 girls all had bad luck this year of losing calves to weather or sickness. We calve the cows out in the pasture and get there once a day, so this does happen.

Lot 34

Bred Cows— 9 and over

4 head

AI bred May 22-25

See additional breeding sheet for individual AI matings.

Bull bred until July 20th

Natural service sires; Here We Go, Axtell Red Knight

These are the grand old ladies. I had to force myself to let go of them. They are all in great shape and have never missed a calving season. If they weren't some of the best they would not still be here! I think they have potential to produce several more great calves, especially with a little more TLC than they get here.
